Separate paging is given to this Part in order that it may be filed as a separate compilation

PART III—SECTION 2

Notifications and Notices issued by the Patent Office relating to Patents and Designs

THE PATENT OFFICE

Patents and Designs

Calcutta, the 27th April 1957

Special Notice

It is hereby notified for general information that the following Group of Abridgments of Patents Specifications has been published and copies thereof are available for sale with the Manager of Publications, Civil Lines, Delhi at Re. 1 per copy.

Copies are also available for sale locally at the counter of the Government of India Book Depot, 8, Hastings Street, Calcutta on cash payment.

Group LIV

—Bearings and Lubricating.

(Containing Abridgments of Patent Specifications between Nos. 30,001 and 35,000).

Application for Patent

The dates shown in crescent brackets are the dates claimed under Section 78-A of the Act.

11th April 1957

60169. M. P. Kasture. Hedron case-cum-tray.
60170. Courtaulds Limited. Improvements relating to the production of regenerated cellulose filaments. (25th July 1956).
60171. Kali-Chemie Aktiengesellschaft. Method of producing aminonitriles having therapeutic action.
60172. W. R. Schmitz. Continuous ageing apparatus and process.
60173. D. P. Ahuja. A process of welding cast iron and a stabilized electrode and flux composition therefor.
60174. Eutectic Welding Alloys Corporation. A brazing flux and a method of brazing same.
60175. Ciba Limited. Process for the oxidation of anthracene to anthraquinone.
60176. Ciba Limited. Method of and apparatus for condensing a sublimate from a hot carrier gas.
60177. Ciba Limited. Improved catalytic reaction vessel.
60178. R. J. Puranik and Walchandnagar Industries Limited. Improvements in or relating to oscillating conveyors.
60179. The Metal Box Company of India Limited. Improvements in or relating to the closing of containers.

12th April 1957

60180. Inventa A.G. Fur Forschung Und Patentverwertung. Process for the preparation of epsilon caprolactum from adipic diamide.

60181. Dr. D. Dhairyam. Improvements in or relating to enuresis appliances.
60182. The Dow Chemical Company. Dye-receptive compositions of acrylonitrile polymers and method for preparing same.
60183. Imperial Chemical Industries Limited. Isolation process. (2nd May 1956).
60184. Allen & Hanburys Limited. Improvements relating to surgical operation tables. (13th April 1956).
60185. T. G. Patel. Improvements in or relating to manufacture of spun reinforced concrete pipes by prestressing.
60186. Dr. Ing. H. Cramer. Improvements in the rolling of metal stock.
60187. Canadian Marconi Company. Noise reduction in continuous wave doppler radar systems. (14th April 1956).
60188. Hamilton, Sons & Partners (Proprietary) Limited. Improvements in or relating to the anchoring of spigots in socket holes.
60189. R. Weinmar and F. Schneider. Improvements in and relating to the treatment of broken up and threshed material.
60190. A. W. Omar. An electromechanical warp control system. (14th April 1956).

15th April 1957

60191. Sindri Fertilizers & Chemicals (Private) Limited. A process of manufacture of fluffed hydrated iron oxide contact mass for dry desulphurisation of gases.
60192. Pradip Plastic Moulders. Improvements in or relating to toys and moulds for same.
60193. A. Nagaraja. Kannada typewriter key-board.
60194. Imperial Chemical Industries Limited. Colouring process. (18th April 1956). [Addition to No. 55849.]
60195. Imperial Chemical Industries Limited. Colouring process. (18th April 1956). [Addition to No. 55850.]
60196. Fords (Finsbury) Limited. Improvements in or relating to bottle caps. (19th April 1956).
60197. Deutsche Gold-Und Silber-Scheideanstalt Vormals Roessler. Process for the production of basically substituted thiophenyl pyridyl derivatives. (23rd October 1956).
60198. C. A. V. Limited and Ricardo and Company Engineers (1927) Limited. Liquid fuel injection nozzles for internal combustion engines. (24th April 1956).
60199. British Telecommunications Research Limited. Improvements in or relating to electrical signalling systems particularly telephone or like systems. (19th November 1954). [Divisional date 18th November 1956.]

60200. Merck & Co. Inc. Natriuretic agents. (1st October 1956).
60201. Merck & Co. Inc. Thiadiazine type natriuretic agents (1st October 1956).
60202. A. E. I. John Thompson Nuclear Energy Company Limited. Improved method of producing a spherical or cylindrical surface of large radius. (16th April 1956).
60203. The Metal Box Company of India Limited. Improvements in or relating to pilferproof caps for bottles and like containers.
60204. Ciba Limited. Manufacture of a new carbamic acid ester.
60205. N. V. Philips Gloeilampenfabrieken. Improvements in or relating to methods of manufacturing bodies from ferromagnetic materials the mono-crystals of which have a non-cubic structure and a preferred plane of magnetisation.
60206. N. V. Philips Gloeilampenfabrieken. Improvements in or relating to a method of producing means for combating noxious organisms and means for combating these organisms.
60207. Montecatini Societe Generale Per L'Industria Mineraria E Chimica. Crystalline butadiene polymers of isotactic configuration and process for producing them. (12th April 1957).
60208. A. Nagaraja. Kannada typewriter key-board.
60209. J. P. Sood. Endless metallic conveyor belt.
16th April 1957
60210. Council of Scientific and Industrial Research. A process for the treatment of rice bran for the preparation of a tocopherol rich oil, a vitamin B complex concentrate and inositol for medicinal use.
60211. Calor-Emag Elektrizitats Aktiengesellschaft. Electrical switch-gear for high voltage.
60212. S. M. Sayad. Pounding machine.
60213. Karl Hopt GmbH. Device consisting of current supply unit with rechargable battery and consumer.
60214. Anzen Sakudo Kabushiki Kaisha. Improvements in grips for monocable carriages.
60215. Anzen Sakudo Kabushiki Kaisha. Improvements in automatic starting apparatus for monocable carriages.
60216. Societe Des Usines Chimiques Rhone-Poulenc. New derivatives for phenothiazine and process for their production. [Divisional date 3rd November 1955.]
60217. J. Bayard, S. F. Rabin and M. D. Scisorek. Flavored drinking straw.
60218. United Kingdom Atomic Energy Authority. Improvements in or relating to lifting devices.
60219. United Plastics Industries, Inc. Method and apparatus for bonding fibers together.
60220. Imperial Chemical Industries Limited. Synthetic polymers. (8th February 1956). [Addition to No. 57141.] [Divisional date 24th April 1956.]
60221. Imperial Chemical Industries Limited. Colouring process. (18th April 1956).
60222. Imperial Chemical Industries Limited. New compositions of matter. (20th April 1956).
60223. Frederick Parker Limited. Washers of bulk material.
60224. E. I. du Pont de Nemours and Company. Method of preparing high molecular weight polyoxymethylenes.
60225. S. C. Esteve. Machine for the production of corrugated plates of fibrocement materials.
60226. S. C. Esteve. Improvements in or relating to pressure injection moulding of fibrocement materials.
17th April 1957
60227. Chinoin Gyogyszer Es Vegyeszeti Termekek Gyara R. T. Process for the preparation of N-substituted sulfonylureas.
60228. Farbwerke Hoechst Aktiengesellschaft vormals Meister Lucius & Bruning. Process for fixing pigments on fibrous materials.
60229. Farbwerke Hoechst Aktiengesellschaft vormals Meister Lucius & Bruning. Manufacture of pigment dispersions.
60230. The British Iron and Steel Research Association. Improvements in or relating to electrical control. (19th April 1956).
60231. Perry Chain Company Limited. Improvements in chain or belt tensioning devices. (7th June 1956).
60232. Commercial Solvents Corporation. Prilling of ammonium nitrate.
60233. Compagnie Generale De Telegraphie Sans Fil. Improvements in radar systems. (2nd May 1956).
60234. Compagnie Generale De Telegraphie Sans Fil. Improvements in or relating to pulse modulated waves receiving systems. (7th May 1956).
60235. C. I. Williams. Cantilever form.
60236. Cummins Engine Company, Inc. Governor controlled engine.
60237. J. Danek and Kovelis. Control arrangements of pneumatic brakes on railway vehicles.
60238. Veb Werk Fur Signal-Und Sicherungstechnik. Wiring for automatic contactless control.
60239. Veitscher Magnesitwerke Actien-Gesellschaft. Reverberatory furnace.

Alteration of Dates

55716. The claim to priority date 12th November 1954 has been abandoned and the application, dated as of 1st November 1955, the date of filing in India.
55721. The claim to priority date 12th November 1954 has been abandoned and the application, dated as of 1st November 1955, the date of filing in India.
58795. Ante-dated to 19th October 1955, under Section 5 of the Act.

Applications Accepted

Notice is hereby given that all persons interested in opposing the grant of patents on any one of the applications referred to below may at any time within four months of the date of this Gazette of India give notice to the Patent Office in the prescribed form No. 6 of the Indian Patents and Designs Rules, 1933 of such opposition.

A limited number of printed copies of the specifications in the following list will be available for sale from the Government of India, Book Depot, 8, Hastings Street, Calcutta, in due course. The price of each specification is Rs. 2 (postage extra, if sent out of India). Requisition for the supply of printed specifications should be accompanied by the numbers of specifications as shown in the following list.

If required typed copies of the specification together with copies of drawings, if any, can be supplied by the Patent Office on payment of the necessary charges which may be ascertained on application to the office.

The dates shown in crescent brackets are the dates allowed under Section 78-A of the Act.

55281. H. Hoffmann-La Roche & Co., Aktiengesellschaft. Process for the manufacture of therapeutically active amines. Accepted on 17th April 1957.

Reacting 1-methyl-3-[2, 6, 6-trimethyl-1-cyclohexene-1-yl]-propyl-amine with a compound of formula $X-[alkylene]_n-R_1$, X being-CHO or a halogen, n , being 0 or 1 and R_1 being tertiary amino group.

55637. Douglas Fraser & Sons Limited. Improvements in or relating to package driving rollers for winding machines for yarn or the like. (19th October 1954). Accepted on 17th April 1957.

Providing the package-driving roller with means thereon such that the co-efficient of friction of the periphery of the roller varies from point to point longitudinally of the roller.

55716. Societe Des Usines Chimiques Rhone-Poulenc. New phenothiazine derivatives and processes for their preparation. Accepted on 17th April 1957.

Reacting phenothiazine derivative with a compound so that the required substituent is introduced at 10-position of the ring.

55721. Societe Des Usines Chimiques Rhone-Poulenc. New derivatives for phenthiazine and processes for their production. Accepted on 16th April 1957.

Reacting phenthiazine derivative with a reactive ester of an amino alcohol.

55755. Agfa Aktiengesellschaft Fur Photofabrikation. Process for the production of several positives from one negative by the silver salt diffusion process. (30th August 1955). Accepted on 15th April 1957.

Exposing silver halide layer to an object treating it with silver halide developing solution in the presence of silver halide solvent and contacting with light-insensitive transfer layer, separating exposed and transfer layers after image is formed, contacting silver halide layer with further light insensitive layer in presence of silver halide developing solution and additional silver halide solvent, separating these two after image formation and repeating this cycle.

55801. Braithwaite & Company (India) Limited. Improvements in and connected with arc welding. (18th November 1954). Accepted on 11th April 1957.

Two or more continuous electrodes wires are mutually insulated and supplied individually with electric welding currents of different characteristics.

55823. F. L. Smidth & Co. A/S. Improvements in machines for weighing and packing powdered or granular materials. (15th November 1954). Accepted on 12th April 1957.

Of the type in which a horizontal container is connected to and fed with fluidized material by a silo or silos and has a number of discharge outlets each leading to a weighing device.

55832. R. Mohr. Improvements in lighters. (18th November 1954). Accepted on 16th April 1957.

Filament mounted on carrier slidable by an actuator from a position where it is deenergised to an igniting position where it is heated by current passing therethrough, the fuel wick and filament carrier positioned in space covered on top by a movable cover which is moved to expose the wick or discharge of gas upon movement of actuator, and there being apertures on walls that cover the space.

55837. Union Carbide and Carbon Corporation. Improvements in or relating to the purification of carbon or graphite articles. (3rd August 1955). Accepted on 17th April 1957.

Subjecting an impure graphite or carbon article to a fluorinating agent.

55844. Imperial Chemical Industries Limited. Process for the manufacture of new azo dyestuffs. (29th November 1954). Accepted on 16th April 1957.

Diazotising amino benzene sulfonic acid and coupling the diazo compound thus formed with dichloro-triazine amino naphthol sulfonic acid.

55845. Imperial Chemical Industries Limited. Process for the manufacture of new monoazo dyestuffs. (29th November 1954). Accepted on 16th April 1957.

Diazotising amino benzene sulfonic acid and coupling the diazo compound thus obtained with dichloro amino naphthol sulfonic acid.

55846. Imperial Chemical Industries Limited. Process for the manufacture of new monoazo dyestuffs. (29th November 1954). Accepted on 16th April 1957.

Reacting an aminoazo compound with cyanuric chloride.

55847. Imperial Chemical Industries Limited. Process for the manufacture of new anthraquinonoid dyestuffs. (29th November 1954). Accepted on 16th April 1957.

Reacting amino anthraquinone compound with cyanuric chloride.

55856. McKee Development Corp. Ligninated fiber pulp and paper. Accepted on 12th April 1957.

Digesting cellulosic material with a hydrotropic salt solution to produce a suspension of crude fibre pulp and directly precipitating the hydrotropic lignin.

55871. SKF Kugellagerfabriken Gesellschaft mit beschränkter Haftung. Drafting mechanism with aprons for textile fibres. Accepted on 12th April 1957.

Providing means for a sliding entanglement of the cradle and the saddle to maintain these two parts in assembled relation.

55873. E. J. Camp. Improvements in or relating to building structures and parts therefor. (22nd November 1954). Accepted on 12th April 1957.

Member for securing a lining or facing slab or panel is attached to the structure by interlocking with the interlocked edges of the sheets.

55900. John Bright & Brothers Limited. Improvements in and relating to machines for the manufacture of cords or the like. (13th July 1955). Accepted on 12th April 1957.

Twisting two or more yarns drawn off bobbins and then combining the twisted yarns into one cord.

55902. E. I. Du Pont De Nemours and Company. Colour photographic films and processes. (9th September 1955). Accepted on 16th April 1957.

Comprising a base, at least one silver halide emulsion layer sensitive to visible radiation and containing a non-diffusing colour-former capable on development, of forming a subtractive dye, and at least one auxiliary silver halide emulsion, slow in speed, sensitive to radiation above the visible region of the spectrum and containing non-diffusing colour-former capable on development, of yielding a dye having spectral absorption in a region of unwanted absorption of the first said dye.

55926. Freins Jourdain Monneret. Apparatus for the combined operation of vacuumbrake and air-brake. Accepted on 12th April 1957.

A valve device is provided which is controlled by compressed air in the vehicle brakes and actuated by a piston, diaphragm or like member.

55948. Dunlop Rubber Company Limited. Improvements in and relating to rubber articles—(21st December 1954). Accepted on 12th April 1957.

Vulcanised rubber having an alkaline earth metal salt of organic acid dispersed therein.

55975. The Firestone Tire & Rubber Company. Improvements in method of tire manufacture. Accepted on 11th April 1957.

Spinning tread and tire body about their common axes and telescoping the tread by applying axial force.

56000. Ciba Limited. New N-oxides of organic pentacyclic compounds and a process for their preparation. Accepted on 17th April 1957.

Treating compounds having nucleus of reserpine with N-oxidizing agent.

56019. British Telecommunications Research Limited. Improvements in or relating to inductors for use in light current electrical circuits. (14th December 1954). Accepted on 11th April 1957.

One or more coils mounted on a support comprising a hollow post and encapsulating material is adapted so as to leave open the hollow post and permit insertion of a magnetic core.

56066. Ko-We Niederschachtoven G.m.b.H. Shaft furnaces. Accepted on 12th April 1957.

Having plurality of nozzles through which blast enters the furnace, an automatically operating valve provided in the supply channel to each nozzle.

56087. Hobbs Transmission Limited. Improvements in variable ratio transmission apparatus. (14th January 1955). Accepted on 17th April 1957.

Suction pipe of the pump has a closed end and restricted inlet openings are provided in the side of the pipe near the end.

56146. E. I. Du Pont De Nemours and Company. Copolymers and photographic emulsions containing the same. (10th August 1955). Accepted on 15th April 1957.

The emulsion contains as a mordant for acid dyes, a polymeric ester comprising an acrylic acid and/or -alkacrylic acid polymer esterified with amino-alcohol salt residues.

56171. D. Napier & Son Limited. Improvements in or relating to combustion turbine engines comprising axial flow compressors. (6th January 1955). Accepted on 17th April 1957.
Consisting of an axial flow compressor co-axially with 2nd driven by exhaust gas turbine, rotor of which is air cooled from air, bled from the annular working planum of the compressor.
56261. P. M. G. De Teramala. Improvements in mechanically propelled or mechanically driven apparatus. (1st March 1955). Accepted on 17th April 1957.
Comprises a prime mover, a hydro-kinetic torque convertor and a reduction gear of ratios between 1:2:1 and 2.24:1.
56262. F. Hoffmann-La Roche & Co. Aktiengesellschaft. Process for the manufacture of piperidine derivatives. Accepted on 11th April 1957.
Condensing α -alkyl-acrylate with methylamine, condensing the product with an acrylate, subjecting the tertiaryamine obtained to ring closure, saponifying, decarboxylating, treating the product in known manner to obtain 1-methyl-3-alkyl-4-phenyl-4-hydroxy-piperidine and acylating the latter compound.
56271. Verwaltungsgesellschaft der Werkzeugmaschinenfabrik Oerlikon. Feeder gear box for turner's lathes. Accepted on 11th April 1957.
Comprises shiftable gear wheels, each of which engages alternatively two gear wheels of substantially equal diameter but of different number of teeth.
56487. Ciba Ltd. Process for the optical brightening of materials of polyacrylonitrile or polyvinyl chloride. Accepted on 11th April 1957.
Treating polyacrylonitrile or polyvinyl chloride materials with a compound free from quaternary ammonium groups and having no dyestuff character.
56532. Council of Scientific and Industrial Research. A new technique for the electrolytic preparation of cuprous oxide. Accepted on 15th April 1957.
Electrolysing a solution of sodium chloride and an alkali in a cell with sheet copper as cathode and refined copper as anode, the anode is kept rotating.
56712. SKF Kugellagerfabriken Gesellschaft mit beschränkter Haftung. Mounting of spinning and twisting spindles. Accepted on 17th April 1957.
The sleeve is made from resilient material encircling the spindle base at least on one side of the spindle rail, one end of the sleeve bearing against the spindle rail where it is secured against radial displacement.
56853. D. Napier & Son Limited. Bearing assemblies for supporting rotary shafts. (25th March 1955). Accepted on 12th April 1957.
Comprises a roller or ball bearing in annular space between shaft and housing, clearance between inner sides a trough and a cup member attached to bearings, and means for passing gas through said clearance to oppose oil leakage.
56969. Schlumberger Well Surveying Corporation. Apparatus for logging earth formations traversed by a borehole. Accepted on 17th April 1957.
A source of high energy monoenergetic neutrons and a neutron moderator partially enclosing the source; the earth formations are irradiated with neutrons.
57043. International Combustion (Holdings) Limited. Improvements in or relating to travelling stockers for shell type boilers. (14th April 1955). Accepted on 16th April 1957.
Comprises a communicating passage to enable air to flow from front end of chamber through return run of stoker.
57044. International Combustion (Holdings) Limited. Improvements in or relating to travelling stockers for shell type boilers. (14th April 1955). Accepted on 16th April 1957.
Comprise communicating passages to enable air to pass from combustion chamber through return stroke of grate to take away dust.
57231. The Singer Manufacturing Company. Sewing machine with feed-throw-out mechanism. Accepted on 11th April 1957.
Bobbin-winder threat spool pin for sewing machine unified with feed throw-out mechanism, the location of the unit being convenient for the operations.
57273. Glaxo Laboratories Limited. Improvements in the production of mutants of the genus penicillium, and the antibiotic griseofulvin resulting therefrom. (16th May 1955). Accepted on 16th April 1957.
By culturing the parent strain in a nutrient mutation medium wherein the assimilable sulphur source is in the form of radio active sulphur isotope of mass number 35.
57305. Metropolitan-Vickers Electrical Company Limited. Improvements in alternating current electric traction equipments. (16th May 1955). Accepted on 11th April 1957.
Of the kind in which the direct current energisation is obtained from a.c. supply by means of a static rectifying means.
57452. Koehler Manufacturing Company. Improvements in or relating to plates and separators for storage batteries. (12th January 1956). Accepted on 12th April 1957.
Comprises a reticulated grid and active material.
57495. Montecatini Societa Generale Per L'Industria Mineraria E Chimica. Process for the production of ammonium sulphate. Accepted on 11th April 1957.
Forming a stronger aqueous ammonium sulphate solution from ammonia and concentrated H_2SO_4 , and a weaker aqueous ammonium sulphate solution from $CaSO_4$ and $(NH_4)_2CO_3$ and drying the stronger solution by utilising its own heat of formation.
57530. Westinghouse Air Brake Company. Combined automatic and straight-air fluid pressure brake equipment. Accepted on 12th April 1957.
Comprises a brake pipe, straight air pipe, a brake cylinder, service valve having plurality of abutments responsive to brake pipe pressure reduction below normal pressure to operate said valve.
57589. Ciba Limited. Process for the manufacture of esters of thiophosphorous acid. Accepted on 11th April 1957.
A dialkyl halophosphite is reacted with hydrogen sulphide.
57590. N. V. Onderzoekingsinstituut Research. Device and process for manufacturing looped yarns. Accepted on 11th April 1957.
The gas supply system comprises one or more channels tangentially debouching into the treatment chamber at the thread supply opening.
57642. International Anemostat Holding Company. High velocity air distribution apparatus. Accepted on 16th April 1957.
An attenuation chamber which is in communication with a plenum chamber having an inlet for air has an outlet device connected to it.
57702. The Metal Box Company Limited. A method of and apparatus for lining components for containers. (22nd June 1955). Accepted on 15th April 1957.
Lining a component by disposing globules of a lining compound; heating the same to obtain a continuous uniform thickness and its curing.
57861. Kanegafuchi Boseki Kabushiki Kaisha. An apparatus for shaping fibre laps in a lap forming machine. Accepted on 11th April 1957.
A pair of grooved lap shaping rollers are loosely mounted on a pair of arms positioned in front of said lap forming rollers on which the ejected lap is received for shaping.

57922. N.V. Philips' Gloeilampenfabrieken. Improvements in or relating to cinematograph film projectors in which the lens objective holder is movable to achieve sharp adjustment. Accepted on 16th April 1957.

Adjusting device which moves lens objective holder, is secured to projector only, whilst objective holder is readily exchangeable so that the position of the adjusting device can be maintained.

58028. Scripto Inc. Ball point writing unit. Accepted on 17th April 1957.

Comprising an ink reservoir having at one end a ball point element, and on the other end sealing means comprising a piston system characterized by spaced piston elements in sealing fluid.

58110. The Colmol Company. Continuous mining machine. Accepted on 12th April 1957.

Comprising in combination a power driven main frame, mining mechanism including a plurality of spaced rotary cutter and breaker arms rotating on spaced parallel projecting shafts, mechanism connecting the mining mechanism to the main frame for up and down and lateral movement.

58120. General Electric Company. Process and apparatus for the continuous manufacture of an elongated body such as wire, sheet, tube, rod and the like. Accepted on 15th April 1957.

Elongated body of solid material passed through a fluent mass to increase cross sectional area and thereafter accreted body is reshaped to the first cross-sectional configuration.

58293. Heinrich Koppers Gesellschaft Mit Beschränkter Haftung. Improvements relating to fluid pressure-operated rotary actuators. Accepted on 17th April 1957.

Reciprocating rectilinear movement of piston transmits rotation of drive shaft.

58506. Sudhir Lal Mukherjee and Albert David Ltd., Manufacture of sulphonyl urea derivatives. Accepted on 12th April 1957.

Reacting p-acetamino benzene sulphonyl urethane with n-butylamine.

58522. Libbey-Owens-Ford Glass Company. Method and apparatus for bending glass sheets. Accepted on 17th April 1957.

Comprising supporting the glass sheet on a mold, heating it, rotating one end of the sheet at an angle to the plane of initial support and depositing it on the mold shaping surface.

58569. Metropolitan-Vickers Electrical Company Limited. Improvements relating to dynamo-electric machine. (13th October 1955). Accepted on 17th April 1957.

Inner frame of stator positioned within outer frame annulus and borne by one or more axially extending co-operating surfaces provided on the annulus and inner frame.

58670. James Mackie & Sons Limited. Improvements in and relating to cop winders. (19th October 1955). Accepted on 16th April 1957.

Each spindle is provided with a supply package creel disposed immediately in front of the plane of the spindles and adapted to accommodate at least one large supply package.

58795. Ciba Limited. Pharmaceutical preparations containing a new 1:3:5-triazine compound. [Divisional date 19th October 1955]. Accepted on 17th April 1957.

Comprising 2-hydrazino-4,6-bis-diethylamino-1,3,5 triazine or salts thereof with a pharmaceutical carrier.

58849. E. Uher. Improvements in or relating to driving means for motorised cycles. Accepted on 17th April 1957.

One gearing arrangement producing infinitely variable change in transmission connected to another gearing arrangement having reduction and step-up ratios.

58929. The Textile & Allied Industries Research Organisation. Machine for testing loom pickers. Accepted on 15th April 1957.

Comprising a fixture for holding a picker for testing, a reciprocating hammer having a striking tip simulating a shuttle tip and is mounted for motion to and said fixture for striking a picker.

59066. Societe D'Electro-Chimie, D'Electro-Metallurgie Et Des Acieries Electriques D'Ugine. Improvements in or relating to the production of ingots. (2nd July 1956). Accepted on 16th April 1957.

Comprises heating a slag which is inert towards the metal to be cast, rapidly pouring the hot slag into the ingot mould and thereafter casting the metal into the slag contained in the mould.

59300. T.O. (Group Services) Limited. Packing containers. (12th January 1956). Accepted on 15th April 1957.

Four rectangular sides hingedly interconnected and each pair of opposite sides divided longitudinally into two hingedly interconnected parts and locking means.

Opposition Proceedings

An opposition has been entered by Parke, Davis & Company, to the grant of a patent on application No. 57117 by C. F. Boehringer & Soehne G.m.b.H.

Patents Sealed

Restoration Proceedings

Notice is hereby given that an application has been made under Section 16 of the Indian Patents and Designs Act, 1911, for the restoration of the following patents:—

No. 27761 and Nos. 29422, 40773 and 49599 granted as patents of addition thereto Shri Dhar.

The patents ceased on the 14th November 1954, owing to the non-payment of the renewal fee on patent No. 27761 within the prescribed time and the cessation of the patents was notified in the Gazette of India, Part III, Section 2, dated the 26th February 1955. Any person may give notice of opposition to the restoration by leaving an application on Form 6 of the Indian Patents and Designs Rules, 1933, at the Patent Office, 214, Lower Circular Road, Calcutta 17, on or before the 8th June 1957.
